

# ARIZONA'S WORKFORCE

A press release from the Arizona Dept. Of Economic Security, Research Administration

December 15, 2005

## State Continues Strong Pace of Job Growth as Manufacturing Records Largest Gain in 18 Months

Arizona's seasonally adjusted rate of unemployment was almost the same in November as it was in October, dropping one-tenth of a point to 4.8 percent, while the nation's adjusted rate of unemployment remained the same as last month at 5 percent. Across the state, the Prescott metropolitan area (Yavapai County) had the lowest adjusted rate of unemployment (4.1 percent) in November, and the Phoenix-Mesa metropolitan area had the next lowest rate (4.3 percent).

Arizona's economy added 26,300 nonfarm jobs in November. This monthly gain was on par with seasonal expectations. Since November 2004, the state has added 97,400 nonfarm jobs. November 2005 was a good month for Arizona because of reported gains in almost all major industry groups, including the largest job growth in manufacturing in 18 months (see graph on Page 2). The exception was information, which remained flat. The largest gains occurred in the industry groups of trade, transportation and utilities; professional and business services; leisure and hospitality; and educational and health services. The private sector added 25,300 jobs, while the public sector increased by 1,000 jobs.

Trade, transportation and utilities job increases (+13,600) were slightly greater than the 10-year average. Trade had a strong gain of 13,500 jobs with the retail sector adding 12,700 jobs and the wholesale sector increasing staffing levels by 800. Transportation, warehousing and utilities was the exception in the industry group with a much smaller gain of 100 jobs.

Job gains were recorded in all reported retail sectors as stores entered the holiday shopping season. November

### Arizona, U.S. Economic Indicators

#### Unemployment Rate (Seasonally Adj.)

	<u>Nov. '05</u>	<u>Oct. '05</u>	<u>Nov. '04</u>
United States	5.0%	5.0%	5.4%
Arizona	4.8%	4.9%	4.6%
Phoenix-Metro	4.3%	4.3%	4.1%
Tucson-Metro	4.7%	4.7%	4.3%
Yuma-Metro	16.5%	15.6%	15.5%
Flagstaff-Metro	5.3%	5.4%	5.1%
Prescott-Metro	4.1%	4.2%	4.0%

#### Arizona Nonfarm Payroll Employment (in Thousands)

	<u>Nov. '05</u>	<u>Oct. '05</u>	<u>Nov. '04</u>
Overall	2,544.0	2,517.7	2,446.6
Over-Month Pct. Chg.	1.0%	1.0%	1.2%
Year to Year Pct. Chg.	4.0%	4.2%	4.2%

marked the first time since March that the retail sector had a greater than 10-year average monthly gain in employment. Almost all retail sectors reported healthy gains with the exception of food and beverage stores, which had a less than 10-year average gain of 400 jobs.

Weakness in air transportation restrained job growth in transportation, warehousing and utilities. Air transportation reported a loss of 200 jobs, while truck transportation had a slight gain of 100 jobs. Utilities remained unchanged.

Professional and business services (+2,500) increased by slightly more than the 10-year average. Professional, scientific and technical services (+1,200), along with employment services (+1,200), had the largest gains in this industry group. Smaller gains were reported in management services (+200), while losses were recorded in business support services (-100) and services to buildings and dwellings (-400).

Employment gains in leisure and hospitality (+2,400)

(continued on page 2)

continued the trend of strong growth in 2005. Job growth in arts, entertainment and recreation (+300) was unusually strong because of November typically being a month of job losses for this sector. However, job growth in food services (+1,900) matched the 10-year average, while increases in accommodation (+200) were weaker than the 10-year average.

Educational and health services had an increase of 2,100 jobs. Health care had the majority of this industry group's gains with an increase of 1,400 jobs. Private educational services (+700) had a third consecutive month of below 10-year average gains in employment. Social assistance employment remained unchanged.

Financial activities had a strong gain of 1,300 jobs. The securities and commodities contracts sector had the most rapid rate of increase with the addition of 300 jobs. However, the largest gains were in the sector of credit intermediation (+600). The real estate sector reported a healthy addition of 400 jobs. Unlike the rest of financial activities, employment levels did not change in the insurance sector.

Construction continued to demonstrate strength in November with an atypical gain of 1,300 jobs. November is typically the month of seasonally related losses for this industry group. Growth was widespread across the reported sectors -- buildings (+400), heavy and civil engineering (+200) and special trades (+700). Since November 2004, construction has added 25,000 jobs to the state's economy, the most jobs of any major industry group.

Natural resources and mining added 1,300 jobs in November. All of these gains occurred in the metal ore mining sector (+1,300) and were related to striking

mine employees returning to work. However, increases in over-the-year figures have illustrated that real expansion has occurred in this industry group.

Government gained 1,000 jobs as a result of expansion at the federal level (+100) and education at the state (+300) and local (+1,900) levels. The end of the Arizona State Fair in November contributed to the decline in state government employment levels (-500).

Manufacturing gained 600 jobs in November. Over-the-month increases were prevalent across most sectors with the exception of fabricated metals with no recorded change. Annual gains in most sectors also indicated that a gradual recovery is well under way in manufacturing. However, continued over-the-year losses indicated that nondurable goods fabrication has been excluded from the recovery in manufacturing.

Other services reported a gain of 200 jobs.

Information employment levels remained unchanged. November marked the third consecutive month of no losses in this industry group. Fortunately, the two reported sectors of publishing (+100) and telecommuni-

(continued on page 3)

cations (+100) both had slight over-the-month increases in November. Reductions in unreported information sectors caused the industry group's total employment to be flat. Over-the-year figures showed additional encouraging signs. For the industry group and especially for the telecommunications sector, the job loss rate has been slowing in recent months. The publishing sector has begun to show signs of a recovery with two consecutive months of annual job gains.

November was another good month for Arizona's

economy with 10 of the 11 major industry groups reporting job growth. Information simply showed strength by showing no change. Arizona's population growth, housing demand and general economic vitality have continued to bolster near widespread growth of jobs in the state. November figures represented the third consecutive month that nonfarm jobs reached new record levels. With one more month yet to be reported, December figures will likely push employment figures even higher in 2005.

Equal Opportunity Employer/Program

Under the Americans with Disabilities Act (ADA), the department must make a reasonable accommodation to allow a person with a disability to take part in a program, service, or activity. For example, this means that if necessary, the department must provide sign language interpreters for people who are deaf, a wheelchair-accessible location, or enlarged print materials. It also means that the department will take any other reasonable action that allows you to take part in and understand a program or activity, including making reasonable changes to an activity. If you believe that you will not be able to understand or take part in a program or activity because of your disability, please let us know of your disability needs in advance if at all possible. This document is available in alternative formats by contacting the Arizona Department of Economic Security, Research Administration, at (602) 542-3871.
